

marketforms.com

SEC Section 16 Filings Simplified.

Scheduled filings: An industry first!

We give you the ability to schedule when you submit your filings to EDGAR so you no longer have to manually file each form individually or wait around to transmit at a particular time.

Zero account setup

Your account comes pre-loaded with all of your Reporting Owner information, relationships, securities, holding balances and footnotes that you have submitted in past filings. There is zero overhead to switching.

Holding manager

Our holding manager keeps track of your reporting owners' securities and balances, and auto-populates your filings with this information. All you have to do is enter the transaction details.

24/7 Support

Looks like the SEC's paper form

Our form looks exactly like the SEC's paper form. With our single page, intuitive form design you don't have to go through multiple tabs or pages to complete your filing.

Auto-Calculation

We automatically calculate table 1 and table 2 post-transaction amounts and only commit the updated amounts to your account database once the form has been filed successfully with the SEC.

Intuitive footnote engine

Add, edit, delete or re-order your footnotes with ease.

Real Time EDGAR Validation

Marketforms validates your entries in real time against EDGAR rules as you are typing them into the form.
